HABILITAT
THE PLACE OF CHANGE

January 30, 2017

To Whom It May Concern:

As the director of one of America's most successful licensed long-term substance abuse rehabilitation programs I am always looking for innovative methods to help people. For over 42 years Habilitat has achieved the highest levels of success by using a no-nonsense approach and by being willing to try non-traditional techniques. We have always operated from the belief that addiction is a symptom, not the problem.

Habilitat helps people from all socio-economic backgrounds and our clients arrive with heavily entrenched levels of addiction including heroin, cocaine, methamphetamine, marijuana and alcohol. Most of our residents have a history of violent acts, abuse, sexual violation, lengthy incarceration and other forms of degradation. They are one of the most difficult populations to help.

A few years ago I was introduced to Mr. Robert G. Smith, creator of Faster EFT. Although somewhat skeptical, I watched with an open mind as he demonstrated his method for cleaning out the hurts, pain and traumas from the past. His method seemed very different but was obviously getting very quick results. As I learned more, we realized he had developed something that would become instrumental in our addiction treatment program. Since that time we have employed his techniques with astounding success.

After visiting our facility a few times and working with our clients, Mr. Smith decided that we could accomplish more if we brought in his top practitioners from around the world to employ his addiction protocol. The results have been so successful that in January 2017 we did just that for the ninth time. Practitioners from every corner of the globe converged upon the island of Oahu, Hawaii for a two week Faster EFT addiction marathon. It was decided the practitioners would live and eat on site among the client population, creating a complete immersion into the tough regimen of Habilitat. Working tirelessly day and night, multiple sessions each day, nearly one hundred people got the chance to work with the most dedicated team of practitioners I have ever encountered.

It has been my pleasure to have Gail Jefferson as our guest at Habilitat, working diligently to break the addiction patterns with our residents using FasterEFT. Our clients have experienced significant internal changes, several of which can be viewed in their video testimonials on www.fasterEFT.com.

Most residents received an initial two-hour session specifically focused on breaking the addiction patterns utilizing Robert G Smith's addiction protocol. Many received additional follow up sessions as needed. The results, as measured by the residents themselves, have been second to none.

Without reservation, we would recommend Gail Jefferson to employ her exceptional skills to any addiction issue. Her confidence, professionalism and dedication are amazing. Her mastery of Faster EFT and the addiction protocol were clearly effective in helping our clients clear away the problems that caused the addiction. We were so impressed that we have invited Gail back next year to continue this important work with Habilitat.
